Objective

Fullstack developer focused on building responsive and user-friendly web applications. Proficient in ReactJS, VueJS, JavaScript, and modern frontend technologies, with working knowledge of backend development and APIs. Seeking to join a collaborative team where I can solve real-world problems, write clean and maintainable code, and continuously improve my technical skills while delivering high-quality products and excellent user experiences.

Work experience

Full Stack Developer

November 2025 - February 2026

Aquatic Store Web Application

Description:

Developed a fullstack web application for an aquarium store, enabling product browsing, online ordering, automatic order processing from livestream sessions, and personalized product recommendations for users.

Key Responsibilities & Features:

- Built responsive user interfaces using ReactJS
- Developed an automatic order processing system for livestream sessions
- Designed product recommendation features based on user needs and behavior
- Developed backend APIs for products, users, and orders
- Implemented authentication, authorization, and data management
- Designed database schemas for fish, accessories, and knowledge content

Technologies:

- ReactJS, JavaScript, Node.js, Express, MongoDB, Cloudinary.
